-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 2/14/2005 has been entered.

Specification

The abstract of the disclosure is objected to because it is unclear what Applicant intends by "...sandwiched between **1A** and **1B**" (see line 3). Parts of the device that are indicated by these reference characters must be disclosed.

Also, the phrase "...and power by an electrical current" (line 6) should be changed to "and powered by an electrical current".

Correction is required. See MPEP § 608.01(b).

The disclosure is objected to because of the following informalities:

It is unclear what Applicant intends by:

1. "The illuminate film is connected to microchip for input" (page 5/20, line 8). Input *what ?*
2. "...illuminate films, EL, LED, OLED, **liquid crystal**..." (page 8/20, lines 4, 5; page 10/20, line 9; page 14/20, line 5). What kind of liquid crystal device is it? Liquid crystal

Art Unit: 2875

cannot be provided itself, without some container (for example LCD panel). Specification does not show where the liquid crystal is contained.

3. the phrase "outlayer 1B..." (page 12/20, line 2) should be changed to "**outer layer 1B**"

Appropriate correction is required.

Claim Objections

Claim objected to because of the following informalities: number of claim is not provided. Misnumbered claim is numbered as claim 1.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

It is unclear what Applicant intends by "lamine wires connection to operator an electric current various messages input, laminate wire connection to operator an electric current to display numbers" (lines 4-6).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 2, as best understood, is rejected under 35 U.S.C. 102(b) as being anticipated by Alexander (US 6,124,783).

Alexander discloses (claim1) an illuminating device having an illuminating film sandwiched between to glass panels and operated by two or four wires connected to the computer. It is well known in the computer art, that any computer has a program chip in order to provide all programmed operations.
